SECTION I—HISTORY OF THE CONCEPT

Chapter 1	The Dental Contour Appliance: A Historical Review	3
	<i>Henry I. Nahoum</i>	
Chapter 2	Essix Technology: Tooth Movement and Retention	11
	<i>John Sheridan</i>	
Chapter 3	History and Overview of the Invisalign System	25
	<i>Trang Duong</i>	

SECTION II—MODELING IN THE INVISALIGN SYSTEM

Chapter 4	Polyvinyl Siloxane Impression Materials	35
	<i>John M. Powers</i>	
Chapter 5	Align's Standard on Quality Impressions	43
	<i>David Chenin</i>	
Chapter 6	Scanning Process and Stereolithography	47
	<i>Srinivas Kaza</i>	
Chapter 7	Invisalign Software	55
	<i>Andrew Beers</i>	
Chapter 8	Virtual Diagnostic Setup	67
	<i>David Chenin and Kent Verdis</i>	
Chapter 9	Attachments	77
	<i>Peter Knopp and Mitra G. Derakhshan</i>	
Chapter 10	Invisalign Attachments: Materials	91
	<i>Eric Kuo and Trang Duong</i>	

- Chapter 11** **ClinCheck: Overview and Preparation** **99**
Craig Crawford
- Chapter 12** **Staging** **105**
Rene Sterental
- Chapter 13** **Overcorrection: Principles and Considerations** **115**
Eric Kuo
- Chapter 14** **Three-Dimensional Superimposition Tool** **121**
C. Van Nguyen and Jihua Cheng
- Chapter 15** **Virtual Invisalign Practice** **133**
David Chenin
- Chapter 16** **Computer-Oriented Dental Measurements** **137**
Vadim Matov

SECTION III—PERFORMANCE CHARACTERISTICS OF THE INVISALIGN SYSTEM

- Chapter 17** **Mechanics of Tooth Movement with Invisalign** **149**
Andrew Beers and Trang Duong
- Chapter 18** **Applications of Mechanics with Invisalign** **153**
Heng Cao and Trang Duong
- Chapter 19** **Biologic Elements of Tooth Movement** **163**
Orhan C. Tuncay
- Chapter 20** **Properties of Aligner Material Ex30** **177**
Robert Tricca and Chunha Li
- Chapter 21** **Ex40 Material and Aligner Thickness** **187**
Trang Duong, Eric Kuo, and Mitra G. Derakhshan
- Chapter 22** **Extraction Treatment with Invisalign** **195**
David E. Paquette
- Chapter 23** **Force Application with Invisalign: Constancy and Compliance** **207**
Trang Duong and Robert Tricca

SECTION IV—CLINICAL CONSIDERATIONS IN USING THE INVISALIGN SYSTEM

- Chapter 24** **Advantages of the Invisalign System** **215**
Trang Duong and Mitra G. Derakhshan
- Chapter 25** **Review of the Diagnostic Process** **223**
Robert L. Boyd
- Chapter 26** **Interproximal Enamel Reduction** **255**
Rainer-Reginald Miethke and Paul-Georg Jost-Brinkmann
- Chapter 27** **Facial Esthetic Examination and Analysis** **271**
Marc B. Ackerman
- Chapter 28** **Surgical Treatment and Invisalign** **283**
Ross Miller and Trang Duong
- Chapter 29** **Feasibility Study of the Invisalign System in Treatment of Adolescents** **293**
Andrew Trosien and Robert Fry
- Chapter 30** **Data Mining: Principles and Considerations** **301**
Eric Kuo

SECTION V—OFFICE DESIGN AND TECHNOLOGY

- Chapter 31** **Invisalign Office Design and Technology** **309**
Orhan C. Tuncay, Marc S. Lemchen, and Agnes A. Kan

Preface

The long-awaited paradigm shift in orthodontics arrived with the introduction of the Invisalign System. This unique treatment approach has been instrumental in removing the ever-present shroud of mystery surrounding orthodontics by allowing both dental practitioner and patient to develop a visual understanding of orthodontic tooth movement. In this way, it has founded a culture of true and attainable visual treatment objectives. Moreover, the esthetic and practical advantages of the system have extended orthodontic services to a greater population.

The Invisalign System is multilingual. Its spoken languages are image acquisition, software (ClinCheck), and the Invisalign aligner. The dialects are the generation of forces, attachment designs, and response of periodontal tissues to the forces generated by the aligner. The regional accents were born through the various applications of ClinCheck, spectrum of cases treated, attachment preferences, and instructions to patients. The adoption of the Invisalign System into a practice, however, is a language unto itself. It has its roots in two different tongues: biology and technology. To be fluent in all of these languages and dialects, the clinician must know the root of the language and how the dialects have been derived.

This book, the first to be written about the Invisalign System, was compiled as an educational tool for all of the languages, dialects, and accents spoken in the world of Invisalign. It is not a how-to manual. Instead, it is designed to expose the clinician to behind-the-scene elements of customization that underlie the production of Invisalign aligners. Equipped with such information, the clinician will better understand the nature of tooth movement with the Invisalign System.

Our deepest gratitude goes to the authors from Align Technology. These individuals took precious time from their daily schedules to write about the inner workings of their operation. The Invisalign System is primarily company driven; therefore, it is their contribution that makes this textbook possible. In particular, Dr Trang Duong's indefatigability in collecting chapters from Align Technology authors is greatly appreciated. We gratefully acknowledge the monumental commitment of Align Technology, through the leadership of Amir Abolfathi, to this project. Finally, we thank Jonathan S. Simmons, whose efforts in the editing, organization, and overall preparation of the manuscript have been invaluable.

Contributors

Marc B. Ackerman, DMD

Associate Professor
Department of Orthodontics
School of Dentistry
Temple University
Philadelphia, Pennsylvania

Andrew Beers, PhD

Director of Engineering Systems
Align Technology, Inc

Robert L. Boyd, DDS

Professor and Chairman
Department of Orthodontics
School of Dentistry
University of the Pacific
San Francisco, California

Heng Cao, PhD

Research and Development Engineer
Align Technology, Inc

Jihua Cheng, PhD

Algorithm Specialist
Align Technology, Inc

David Chenin, DDS

Resident Orthodontist
Department of Orthodontics
School of Dentistry
University of the Pacific
San Francisco, California

Craig Crawford, DDS

Orthodontist
Align Technology, Inc

Mitra G. Derakhshan, DDS

Clinical Manager of European
Operations
Align Technology, Inc

Trang Duong, DDS

Senior Staff Orthodontist
Align Technology, Inc

Robert Fry, DDS

Private Practice in Orthodontics
Olathe, Kansas

**Paul-Georg Jost-Brinkmann,
Prof Dr Med Dent**

Senior Lecturer
Department of Dentofacial
Orthopedics and Orthodontics
University Hospital Charité
Humboldt University of Berlin
Berlin, Germany

Agnes A. Kan

Architect
Philadelphia, Pennsylvania

Srinivas Kaza

Product Engineer
Align Technology, Inc

Peter Knopp

Senior Manager and Product
Engineer
Align Technology, Inc

Eric Kuo, DDS

Director of Product Development
Align Technology, Inc

Marc S. Lemchen, DMD

Private Practice in Orthodontics
New York, New York

Chunha Li, PhD

Manager of Materials Research
Align Technology, Inc

Vadim Matov, PhD

Senior Algorithm Specialist
Align Technology, Inc

**Rainer-Reginald Miethke,
Prof Dr Med Dent**

Professor and Chairman
Department of Dentofacial
Orthopedics and Orthodontics
University Hospital Charité
Humboldt University of Berlin
Berlin, Germany

Ross Miller, DDS

Private Practice in Orthodontics
Sunnyvale, California

Henry I. Nahoum, DDS

Professor
Department of Orthodontics
School of Dentistry
Loma Linda University
Loma Linda, California

C. Van Nguyen, DDS

Private Practice in Orthodontics
Houston, Texas

David E. Paquette, DDS

Private Practice in Orthodontics
Charlotte, North Carolina

John M. Powers, PhD

Professor of Oral Biomaterials
Director, Houston Biomaterials
Research Center
University of Texas Dental Branch at
Houston
Houston, Texas

John Sheridan, DDS
Professor
School of Dentistry
Louisiana State University Health
Sciences Center
Baton Rouge, Louisiana

Associate Professor
Department of Orthodontics
Jacksonville University
Jacksonville, Florida

Rene Sterental, DDS
Staff Orthodontist
Align Technology, Inc

Robert Tricca, PhD
Director of Product Development
Align Technology, Inc

Andrew Trosien, DDS
Consulting Orthodontist
Align Technology, Inc

Orhan C. Tuncay, DMD
Professor and Chairman
Department of Orthodontics
School of Dentistry
Temple University
Philadelphia, Pennsylvania

Kent Verdis
Manufacturing Process Engineer
Align Technology, Inc

Figs 25-24 to 25-28 Patient 7.

FIG 25-24 (a to l) This 46-year-old patient desired to have the moderate maxillary and mandibular crowding corrected specifically with Invisalign. She had previously declined a four-premolar-extraction treatment by another orthodontist. Mild protrusion was present, but the patient was satisfied with her facial appearance, and her lips were competent. She had a Class I posterior occlusion with anterior crossbite of both maxillary lateral incisors. The maxillary right canine had significant loss of clinical crown length as a result of previous periodontal disease. At initial presentation, she was in periodontal maintenance and had not lost additional bone in 4 years.

FIG 25-25 ClinCheck images (*a to e*, preoperative; *f to j*, treatment goal) suggested a possible outcome with expansion and IPR.

FIG 25-26 (*a to c*) Note the traditional use of midline elastics. Midlines were corrected by asymmetric Class II and Class III elastics attached to the teeth on clear buttons.
